VOL. XXVIII, No. 38

WAINWRIGHT, ALBERTA WEDNESDAY, JULY 22nd, 1936

Price \$2.00 Per Year In Advance

Local Couple Gave Marriage Vows Fri.

At the home of the bride's parents, Mr. and Mrs. Percy E. Wiley, on Third avenue, on Friday afternoon last, the Rev. W. S. Brooker, of St. Andrew's (pres.) church, joined in holy wedlock Miss Hazel, daughter of the host, and William, son of Mr. John George Davidson, only son of Mr. and Mrs. D. W. Davidson, of Wainwright.

Given in marriage by her father, the bride looked charming in a smartly tailored dress of grey crepe trimmed in blue, with shoes and accessories to match. She carried a shower bouquet of pink and white peonies.

Miss Georgina Wiley, who attended her sister as bridesmaid, wore a suit of white crepe, her flowers also being pink and white peonies. Mr. Phil Stuart, of Wainwright, acted as best man.

The rooms were attractively decorated with white and pink streamers, the floral additions being delphiniums, peonies and roses.

After the nuptial vows a buffet luncheon was served to some thirty friends and relatives of the young couple, and the handsome three-tiered wedding cake, which formed a truly fitting centerpiece was cut by the bride in time-honored custom.

Assisting in serving were Mrs. J. Gehring, Mrs. W. Bibby and Mrs. A. Hutchison.

Following the reception the happy couple left amid showers of confetti and rice to motor to Edmonton for a short honeymoon, and upon their return will take up residence at Dods, Alta.

WEDDING BELLS

READ-POPE
At the United church parsonage on Thursday evening last, the marriage was solemnized by Rev. T. E. Armstrong, the pastor of Mr. Ivan Robert Read of Provost, and Miss Margaret Helen Pope of Hayter, before a few personal friends.

The happy couple who are now away west on a short honeymoon will take up residence on the groom's farm at Provost upon their return.

Gracie Allen Starring in Theatre Offering

The kind of comedy that should bring the fun fans rushing to the box office is being shown Mon. and Tues. only next week in "Here Comes Cocotte".

It is ridiculous nonsense in dialogue and action from start to finish. Hilarity is the key note and sole objective. The idea of the story which serves as a peg on which to hang all the foolishness, is super-funny in its own way.

Wealthy Harrison Allen, fearing that his daughter Gracie, is going to marry a man that he doesn't like and who, thereby, stands a chance of inheriting his fortune, wills it to his eccentric offspring for a two-month period confident that she will have no difficulty getting rid of a good part of it.

Reading in a paper that a lot of actors are destitute, Gracie rounds up a group of at-liberty vaudeville acts and in a way that is serious to her (but funny to everyone else) conceives an idea of producing a show at a \$20 top that will go a long way towards breaking her father because she thinks that nobody will pay that price no matter how grand or horrible the show might be.

Allen is left destitute and the mad collection of acts whom her merry way toward making ready for the show. In the end—as monkey acts, knife throwers, club swingers, jugglers and pirate singers—all their stuff, the old man arrives home in a daze after having been left penniless to be further amazed that Hollywood producers have gone wild over Gracie.

If you want a good laugh, don't fail to see "Here Comes Cocotte" at the Elite theatre on Monday and Tuesday of next week.

Remember first two days only!

WAINWRIGHT WIN OVER CHAUVIN IN SUNDAY GAME

The local ball team motored to Chauvin on Sunday afternoon last and avenged the one-sided trouncing they received the Sunday previous by defeating the Chauvin team 5-4. The Sports brothers made up the battery for Wainwright.

It is noted that School Inspector L. Good has been elected to executive of the Alberta School Inspectors' association.

Fabyan Farmer Dies at Local Hospital

Mr. A. A. Taylor, who for several years has farmed north of Fabyan, passed away in the hospital on Sunday last at the age of 55 years.

The late Mr. Taylor, who was born in Blackstock, Ont., came to this district some sixteen years ago with his family. For some years he has been a sufferer from heart trouble, and on Saturday last taking a seizure at his home he was rushed in to Wainwright for treatment but passed away as stated.

There are left to mourn his wife and one daughter (Mary Winnifred) as well as four sons (George, Gerald, John and Allan) and three brothers (in Ontario).

THE FUNERAL

Was held on Tuesday afternoon at the Irma United church, where the pastor Rev. E. P. Kemp, conducted the service, interment being made at the Irma cemetery.

Arrangements were in the hands of McLeod's parlors, of Wainwright, and the pall-bearers were Messrs. S. Bowerman, F. Thurston, W. Gray, J. Thompson, H. Adams and J. Ballentine.

Floral tokens of sympathy were from Wife and Family, Mrs. Ballentine and Family, The Prosser Family, Mr. and Mrs. S. Williamson, Mr. and Mrs. J. Thompson, Mr. and Mrs. J. Welch, Mr. and Mrs. Street and Family, Mr. and Mrs. T. Altkman, Mr. and Mrs. Willerton, Mr. and Mrs. Bachelor, Mr. and Mrs. Holt, Mr. and Mrs. Milton, Mr. and Mrs. Hugh Adams, Mr. and Mrs. C. Steele, Mr. and Mrs. W. Steele, Mr. and Mrs. Anderson, W. Walker and Family, Mr. and Mrs. F. The Backs Family, Mr. and Mrs. G. Geary (Edmonton), Mr. and Mrs. F. Thurston, Mrs. Bryana, Stuart and Walter, Sew & So Ladies' Club.

STILL A HEADLINER

It is interesting to note that Alberta is in the centre of the world news, despite wars and rumors of wars. As far as the news from Canada goes Alberta shares the front page with only another rival—the Quintuplets. This was the assertion of the Foreign news editor of the London Daily Express, Lord Beaverbrook's paper with 2,500,000 circulation in Great Britain. Mr. Sutton, the above named news editor was in Edmonton recently and had a long interview with Premier Aberhart and other prominent citizens. He said Edmonton was one of the nicest cities he had visited in Canada.

Registration for Div. Causes Gov. Meeting

Members of the legislature who can devote from three to six weeks of their time to assisting the government in registering residents for receipt of basic dividends and otherwise aiding in starting Social Credit in this province will meet with Premier William Aberhart and members of his cabinet on Thursday and Friday of this week. Hon. Ernest Manning, minister of trade and industry declared in addressing the Edmonton Prospector's Club Conference on Saturday in Edmonton.

The minister also expressed the concern of the government over the drought situation.

The seriousness of the drought problem was not to be overestimated he said. It was important that everything possible be done to conserve the natural products of the province.

"The government is giving serious attention to this problem," he said. "The government is relying on the wholehearted co-operation of all residents of the province to cope with this situation. The scarcity of marketable products will mean less purchasing power for the people. Specially will producers of primary products, representing the largest percentage of people in this province where agriculture remains the basic industry."

The Minister announced that the government must also make provision for establishment of credit houses in various provincial communities to handle the leasing and distribution of provincial credit.

"We feel now is the great opportunity for the people. They have been patiently waiting and now it is time to act," he said. "If they want to free themselves from the financial straits they will have a great opportunity in the next six months. We hope producers and manufacturers specially will give careful consideration to the advantages of using provincial credit for the purchase of Alberta produced goods."

Mr. Justice Ford Gives Ruling Re Gas Franchise

Town is Not Bound to Buy Equipment

Town of Wainwright is not compelled to take up its option to buy equipment of the Wainwright Gas Co., Ltd., if it refuses to renew the company's franchise on expiration at Dec. 31, 1936. Mr. Justice Ford ruled in supreme court judgment handed down Thursday.

The case was brought to court when the two parties agreed to seek a judge's opinion on their positions regarding the terminating agreement.

Neil D. Maclean, K.C., representing the town of Wainwright, S. W. Field K.C., for the Wainwright Gas Co., Ltd.

Results of Recent Conservatory Exams

Following are the complete results of music examinations held recently at the local center (St. Joseph's convent) under the direction of Mr. V. Kihl, professor of piano at the Toronto Conservatory of Music:

Marie Kraft—Counter grade V, honors; history of music, first-class honors.

Marie Ruth—Grade II theory, first-class honors; grade V piano.

Marion Lane—Grade II theory, first-class honors; grade VII piano.

Edna Schultz—Grade I theory, first-class honors; grade VIII piano honors.

Patricia Washburn—Grade II theory.

Mary O'Callaghan—Grade I theory, first-class honors; grade V piano honors.

Jean O'Callaghan—Grade II theory honors.

Grade V piano—Antoinette Kraft, honors; Ellen Street.

Grade IV piano—Mona Ganderon, Vera Moffatt, Gordon Schlitt, Lena Schultz.

Grade III piano—Shirley MacKenzie, honors; Patricia Grogan, honors; Winnifred Grogan, Fred Wilson.

Grade II piano—Dorothy Scott, honors; Irene Brasseur, honors; Georgina Mackay, honors; Malcolm Cameron, honors.

Grade I piano—Marjorie Courcier, first-class honors; Doreen Adams, honors; Elsie Somick, honors.

Vocal, primary—Antoinette Kraft. The following pupils received special academy certificates: Vocal (primary), Marcela Donovan, honors; Vernon Prosser, honors; (II), Ruth Harden, honors; Jack Collett; (I) Thelma Vail, honors; Alice Dalton, honors.

Hail Storm Ravages Drumbheller District

DRUMBHELLER.—A storm of cyclonic intensity ploughed through the Drumbheller area Saturday evening last, wiping out close to two million bushels of grain and causing thousands of dollars damage during 40 minutes of spectacular display by the elements which at the same time brought its compensating benefits to farmers whose land bordered the eight-mile swath of hail which cut clean as a knife from Carbon in the west down the south bank of the Deer river, through the Pege Leane district, through the Acadia Valley and over Millerfield.

The city of Drumbheller bore the brunt of the storm, which did property damage valued at more than \$30,000.

HIGHER GRAIN PRICES LIKELY

Higher grain prices as a result of the drought, which is the worst in the history of the prairie west, a forecast by J. J. MacLellan, of Taber, vice-president of the United Grain Growers and former minister of public works in the U.P.A. government.

Mr. MacLellan, who was an Edmonton visitor and who was accompanied by E. S. McIlroy, Calgary, general manager of the U.G.G. for Alberta, declared that a fair crop will be harvested in the Edmonton district, providing all goes well from now on.

The two visitors have just completed a motor trip in the eastern part of the province and were through this district early last week.

Suicide in Well in Cummings District

Lloyd Rae of Edmonton, 32 years of age, was found dead in a well on the farm of Wm. Irving, in the Cummings district, on Wednesday morning last.

Rae, whose home was in Edmonton, had arrived at the Irving home on Sunday for a visit. He was not in the best of health and despondent, having been out of work for two years.

He had retired as usual on Tuesday evening but had been heard moving around about midnight Wednesday morning he did not appear for breakfast, but due to his ill health this did not cause any apprehension.

The discovery of the body was made when the men were hauling water from the well to water stock for which this well was only used. One barrel of water had been drawn when the pull refused to fill properly. Investigation as to the cause led to the finding of the body of the unfortunate young man.

The family doctor was called from Vermilion, R.C.M.P. notified and communications established with relatives. One brother, who travels this district happened to be in Vermilion last night and returned to the scene of the suicide. Interment took place in Edmonton.

KING EDWARD VIII

OBJECT OF ATTACK

who, last week, as he was riding through Hyde Park London, was the object of a missile, in the form of a loaded revolver, thrown by a shabbily-dressed Englishman. The revolver struck the king's horse on the flank and fell to the ground. The King observed the weapon and rode on, while the man who threw it was arrested and is now in custody.

WEDDING BELLS

SCRABA—MCARTNEY
On Wednesday afternoon last at the home of Mr. and Mrs. J. W. McCartney, Lamont, a very pretty wedding was solemnized by Rev. N. D. McLeod, pastor of Lamont United church, when Rita Evelyn, only daughter, and Ell Scraba, son of Mr. and Mrs. William Scraba (formerly of Wainwright) were united in marriage. The rooms were beautifully decorated in blue and white summer flowers. The bride on the arm of her father, entered the living room, wearing a beautiful gown of white net over satin with veil and orange blossoms, and carrying a bouquet of pink and white carnations. She was attended by Miss Vela Menary of Edmonton. Mr. Harry Scraba, brother of the groom, was best man. At the conclusion of the ceremony a dainty buffet luncheon was served to about 25 guests.

The bride's going away costume was a navy figured silk dress with plain navy jacket and white silk hat. They left by motor for Calgary, where a short honeymoon will be spent before going on to Blairmore, where they will reside.

We are indeed sorry to learn that Mrs. Eva Turner has had to again return to the hospital, and wish her a return to better health.

Premier Says Gov't. Will Redeem Scrip

CALGARY.—Premier William Aberhart in discussing the prosperity bond plan and the government's hope of increasing purchasing power declared at the Prospector Bible Institute Sunday that wholesalers of the province needn't be afraid of accepting the scrip as the provincial government will redeem it with cash. The premier stated: "We will have it for him. He needn't be afraid."

Alberta merchants in the face of one of the worst droughts ever experienced have the prospect today through acceptance of the government's new scrip plan Prosperity Bonds—of obtaining \$2,000,000 worth of business under the merits of the new scheme, the premier intimated.

First issue of scrip, expected to be in circulation by August 1, will be \$250,000 and this, Premier Aberhart declared is expected to create \$2,000,000 worth of business. Jobs will be put at road work, paid for by prosperity bonds.

Conditions created by the drought, the premier said, were being given serious thought by the government. "We are, in reality, facing a rational crisis. This drought is not confined to Alberta alone, but to the other provinces as well. The federal government, therefore, must at once assume their share of the burden that falls on the Canadian people through this misfortune. No province can face it alone."

"Five thousand notices issued to each Alberta constituency, if kept in circulation, should add \$40,000 worth of business. It should be quite a boost to business in the smaller places."

FEDERAL & PROVINCIAL RELIEF COMMISSIONS

Drought conditions and general relief matters will be discussed by Hon. Charles Crockett and A. A. MacKenzie, chairman of the Alberta Relief Commission with the Dominion Relief Commission at Ottawa on Thursday. Hon. Mr. Crockett and Mr. MacKenzie left Edmonton on Sunday night for the east.

General relief and drought problems would be the main purpose of his visit, declared the Minister.

He said that the southern part of the province was specially hard hit by the drought, everything south of a line drawn from Hardisty to Calgary was practically dried out.

Alberta Crop Report States Outlook Poor

(Issued by Alberta Department of Agriculture, Edmonton)
Extreme drought conditions have continued during the past two weeks in southern and east-central areas with the result that in the eastern portions of these districts particularly hope for a harvest of any consequence has been abandoned. That part of the Province from the Taber-Medicine Hat line north through the Herry Creek area to Provost has suffered most intensely, and an almost complete crop failure is accepted by the major portion of this section. Pastures and forage crops in these districts are burned up and shortage of feed is a cause of immediate concern. It is still hoped, with the advent of rain, that a portion of the grain crop may yet be salvaged as feed, but the feed situation in any case is likely to be quite serious.

In the more westerly districts from the U.S. boundary north through the Calgary area, the not dry weather has also taken a heavy toll, but with rain at an early date fair crops may yet be harvested in some sections.

In the west-central districts and extending for a distance north of Edmonton, only a few light scattered showers have fallen in the last fortnight. Crops, though as a whole not yet suffering excessively, have utilized all reserve moisture and are heading out short. Yields will be much reduced unless there are general rains at an early date. The continued dry weather is especially hard on the later sown grains and the hay crop is considerably below average. To the west of Edmonton and to the east, showers have been more general and crops continue to develop very favorably.

In all sections of the Peace River country there has been plenty of rainfall and conditions generally are excellent. An exceptionally good crop is in prospect throughout this territory.

Some hail has occurred at points in the central and northern districts, but damage in most cases has not been heavy and is confined to a few small patches.

Highest temperatures during the past week were registered on Monday afternoon at 4 p.m. when the mercury raised to 91 degrees in the shade on Main street. It was 132 in the sun!

Death Calls Mrs. Adelaide J. Gilbert

After a sickness of long standing, Mrs. Adelaide Jane Gilbert, who was born at Kempton, Ont., 65 years ago, died at the Wainwright hospital on Wednesday last.

The deceased came to reside in the Roseade district in 1910 with her husband, who predeceased her 12 years ago. There are left to mourn two sons, Howard and William and five grandchildren (all of Roseade), three sisters, Mrs. J. Granigan, of Vancouver, Mrs. Benson Craig, of Calgary, Mrs. Thos. Mackey, of Ottawa and two brothers, Messrs. James and Robert Tempest, of Kempton.

The funeral which took place on Friday at Roseade church was in charge of Rev. J. Sutcliffe of Edmonton, and interment was made in the family plot at Edmonton. Mrs. Granigan came here from Vancouver for the funeral.

The funeral was in the hands of McLeod's parlors, and the pallbearers were—Messrs. F. Redmond, E. Avison, P. and J. E. Knott, J. Rubles and F. Snell.

Among the floral tributes testifying to the esteem in which the deceased lady was held were those from W. A. Gilbert, Howard & Allie and Children, Mr. and Mrs. H. Tempest, and family, Mrs. J. S. Granigan, Mr. and Mrs. Frank Redmond, Mr. and Mrs. Empey, Mr. and Mrs. E. Burnett, Mr. and Mrs. P. Smale, Mr. and Mrs. F. Zajic and family, Mrs. A. Redmond, James and Kathleen Redmond, Mr. and Mrs. W. Reynolds, Mr. and Mrs. Gahrie and family.

CARD OF THANKS

The Family of the late Mrs. A. J. Gilbert wish to express their sincere thanks for the many kind tokens of love and respect in their bereavement, and especially to the doctors and nurses at the hospital, and to the messengers of sympathy from Robert and James Tempest, of Kempton, Ont.

"Way Down East" Shows This Week

"Way Down East" which has long been considered one of America's greatest melodramas, is showing at the Elite theatre on Friday and Saturday (only) this week-end. It is sentimental and sympathetically stimulating, but not overdone. There isn't a trace of hokum in the whole production. The drama is honest and believable; gripping in its realism. The suspense and thrill marking its anti-climax is terrifying yet fascinating.

As fresh and new as 1935 production, direction and acting can make it the time of the story is a couple of generations ago; the locale, a rural New England village and farm home. The atmosphere of the setting and the character of its people is captured with charm and vividness.

It is the story of Anna Moore, her four-tinged happiness in new-found love, the heart break of her disillusionment as she is made the victim of cruel vicious gossip; her near tragedy and final triumph. Told by players living in its spirit, it presents Rochelle Hudson as Anna, and Henry Fonda as the hero. Comedy is ably provided by Slim Summerville.

The production features such incidents as the barn dance, quilting bee, skating and hayrack parties of early days and the thrilling and sensational chase on the blizzard-swept breaking river ice.

"Way Down East" will win the praise of all who see it. Don't forget it shows for only two days at the week-end.

STATES DROUGHT NOT AS WIDESPREAD AS 1934

CHICAGO, Ill. Predictions of drought may yet be a boon to the United States farmer since recently from the grain belt as week-end showers poured new life into the corn crop.

If rains continued and spread they were already scattered over Minnesota, Wisconsin, Iowa, Missouri, Illinois, Indiana and Michigan—old hands at crop forecasting declared the farmer as a whole would be better off financially than with a bumper crop.

The drought had done stage-like damage in some states, they said, but it was not nearly as devastating or widespread as the 1934 disaster.

Mr. C. Callas was a week-end tripper to the city.

Advertisements

are a guide to values . . .

Experts can roughly estimate the value of a product by looking at it. More accurately, by handling and examining it. Its appearance, its texture, the "feel" and the balance of it all mean something to their trained eyes and fingers.

But one person can be an expert on steel, brass, wood, leather, foodstuffs, fabrics, and all of the materials that make up a list of personal purchases. And even experts are fooled, sometimes, by concealed flaws and imperfections.

There is a surer index of value than the senses of sight and touch - knowledge of the maker's name and for what it stands. Here is the most certain method, except that of actual use, for judging the value of any manufactured goods. Here is the only guarantee against careless workmanship, or the use of shoddy materials.

This is one important reason why it pays to read advertisements and to buy advertised goods. The product that is advertised is worthy of your confidence.

Merchandise must be good or it could not be consistently advertised. Buy advertised goods

The Wainwright Star

JUST FOLKS

(By S. R. BOWELL)
Once upon a time there lived a Prince. He was goodly to look upon, tall, and strong, skillful at sport, and mighty in battle. But his father,

the King, was much exercised by reason of his being very dilatory on the question of marriage. The Court was thronged with the fairest of the fair, and yet the Prince would not choose and when the King

remonstrated yet again, he opened his mouth and said unto him, "Sire, I cannot abide their chatter." Now, the fame of this unwed Prince spread far and wide, until it reached the borders of a distant Kingdom wherein dwelt a beautiful Princess, which, upon hearing, she called her maidens unto her, and said, "Come now, and we will go even unto this realm, and look upon this marvelous Prince. And now hearken diligently unto me. I shall feign dumbness, and you shall converse with me by signs. So shall we see how things will

develop. So they set out, and after many days did arrive at the borders of the Prince's Kingdom. Whereat, the Prince, having heard tales of this Princess did rise up and to meet her. And beholding her loveliness did exclaim, "Now, to my faith, she is just what I have been looking for. For is she not beautiful as a heart of Paradise and will not trouble me with tongue-wagging of words? I am heartily sick." So he joyfully took her to wife. But shortly thereafter, loving her much, and moved with compassion, he said, "Would that thou wert able to speak a little, for it does seem passing cruel that one so lovely and so good should have no voice." Whereupon, the Princess giving over feigning said unto him, "Very well, my Lord, I am not quite so dumb as I look." And he joyfully taking her in his arms replied, "Verily, honey, thou seemest more, in that remark that appeareth on the surface, at that"

S26W (36)

In Sickness and in Health

(Condensed for Reader's Digest by Kyle Crichton)

The one certain thing about a doctor is that when you want him, you want him. Time, tide and tummy-ache wait for no man. What follows after that is how you are going to pay him and how he is going to live if you don't pay him and what is going to be done about this business of getting sick.

I have a friend who has been captured by the idea that his family is practically immune from disease. He is healthy, his wife is no weakling and his three children are on the tough side—the doctor comes but rarely to their house. For this reason I asked him to look over his check stubs for last year and find exactly what his medical bills had been. He found that he had paid \$25 to a hospital and \$50 to a surgeon for a tonsil operation for one of his boys. When his little girl fell and cut herself over the eye, there was one house and one office call by the doctor, \$5; whooping cough, three milds, \$9; examinations for her wife, suffering from some minor ailment but afraid it might be more serious, \$20; making a total of \$107. But soon after he made this compilation for me something more serious happened. His wife was operated on for the removal of a cyst. The cost of the operation and hospitalization came to \$750. In short, he spent more for one severe, unpredictable illness than he ordinarily might spend for the entire family in seven years.

This is the big problem agitating medical circles these days. Looking around for some way to allow a family to anticipate medical needs, various plans have sprung up for health insurance and prepayment medical care. What it amounts to is simply that a man will pay a fixed monthly sum for the care of his family, whether they need attention or not. The method can best be explained by telling how the Ross-Loose Clinic in Los Angeles works. The clinic was started six years ago at the request of various associations of city and county employees who wanted the same sort of medical protection being afforded the employees of several large industrial units. At the present time the clinic has 15,500 subscribers representing 33 groups of employees. The subscriber pays \$2 a month for himself and his dependents, for which he is entitled to drugs, dressings, three months' hospitalization, ambulance service, office and residence calls, laboratory work and X-rays. His dependents get the same service except that cost prices are charged for hospitalization, drugs and dressings. X-ray films, ambulance service and the service of specialists' not on the staff of the clinic.

If the patients like the service and if the staff is competent, it would seem to a layman that too was rather all right, but the Ross-Loose Clinic is the most tempestuous in the medical profession. Both Dr. Ross and Dr. Loose are of the highest standing, yet they were expelled from the Medical Society last year. What is at stake, of course, is not their reputations, but the principle of prepayment health service.

There is serious need for some change in our medical procedure. The Committee on the Costs of Medical Care, fostered by President Hoover and headed by Dr. Ray Lyman Wilbur, former president of the American Medical Association, reported in 1932 that 52 per cent of the American population receive no services from a physician, 79 per cent get no attention from a dentist, 89 per cent receive no health examination or similar preventive service and 62 per cent receive no medical, dental or eye care of any sort. These statistics are for the prosperous years of 1928-29. Conditions are admittedly much worse now.

On the other hand, although many doctors have good incomes, one-third of all physicians in this country had incomes of less than \$2500 even in 1929. More doctors were to be found in the \$1000 to \$2000 class than in any other. When I was in Philadelphia recently I was told of doctors and dentists driving taxicabs and working as manual laborers. Others were taking institutional jobs or working in city clinics at salaries below that of the ordinary clerk. Hence the plans for prepayment medical care and the rumormongering of the profession. It reached a climax with a majority report of the Committee on the Costs of Medical Care which recommended health insurance and other arrangements leading to the socialization of medicine. To this the Journal of the American Medical Association replied with a blast denouncing the report as "Socialism and Communism inciting to revolution."

The opponents of health insurance make these objections: It will sap the initiative of the physicians; it will upset the personal relationship between the doctor and the patient; and turn good doctors into medical robots; it will make guinea pigs of the patients; it will give a bad press men a chance to use the doctors for their own profit. The advocates

of health insurance reply: Every plan yet proposed gives the patient the choice of his physician. But just for the sake of argument, what is the matter with a clinic? Only a few of the thousands who go to the Mayo Brothers at Rochester, Minn., get the attention of either Dr. Will or Dr. Charles Mayo. They are assigned to doctors they have never heard of but in whom they have confidence because of the reputation of the clinic.

Health insurance is comparatively new in this country but the movement abroad began in 1883 when Bismarck inaugurated the plan in Germany. It now takes in 40,000,000 beneficiaries out of a total German population of 63,000,000 and engages the services of 35,000 physicians out of a total of 50,000. With the German plan as an example, health insurance has spread to 40 countries, including every nation in Europe but Italy.

Even in the United States we have had something like health insurance for a long time. We have had company medical care by large industrial units. In addition there are clinics operated by various medical associations, particularly on the Pacific Coast. In this plan the physicians themselves form the organization and run it. The patient has his choice of his doctor from the entire list of the society and is the ex-clusive case of that practitioner. Membership fees run from \$5 to \$100 depending upon the amount of help the association has from other local sources. In other cases subscribers pay from \$1 to \$2 a month.

The American Hospital Association, moreover, has endorsed a plan for group hospitalization. This does not include the services of a physician but takes in board and room, in-patient service, operating room, laboratory and X-ray for a period ranging between 15 and 30 days. The usual annual rates are from \$5 to \$12 a subscriber. The most important developments along this line are at Dallas, Texas, and the city-wide plan at Newark, N.J. The Baylor University Hospital in Dallas started in 1920 and by 1934 had 15,000 subscribers. The Methodist Hospital in the same city later enrolled more than 7000 members and St. Paul's Hospital took on more than 1000 subscribers in a year. There are many individual hospitals and small groups of hospitals over the country now giving prepayment service.

It must not be thought that the members of the American medical profession who oppose health insurance are simply selfish. As doctors in the manager. In all sincerity they feel that anything breaking up the personal relationship between the patient and the physician can result in evil to both. They maintain that health insurance may seem feasible but such plans go rapidly from a voluntary to a compulsory base and eventually end in government control—state medicine. And it is true that may recent prepayment plans have been in the hands of unscrupulous promoters who have sold memberships by high pressure methods and then departed with the money when the receipts began to fall off.

But something is wrong with our present system. Millions of Americans receive no medical care of any sort while thousands of doctors, dentists and nurses are without adequate income because they can't find patients with money enough to pay for their services. That is what is known in dramatic circles as a situation. Many who have studied the problem think it is the cue for health insurance to come upon the stage.

LIFE

Life is too brief
Between the budding and the falling
leaf.
Between the seedtime and the golden
sheaf.
For hate and spite.
We have no time for malice and for
greed;
Therefore, with love, make beautiful
the deed;
Past speeds the night.
Life is too swift
Between the balloons and the white
snow's drift.
Between the silence and the lark's
uplift.
For bitter words.
In kindness and in gentleness our
speech
Must carry messages of hope and
reach
The sweetest chords.
Life is too great
Between the infant's and the man's
estate
Between the clashing of earth's
strife and fate.
For petty things.
Lo! We shall yet, who creep with
cumbered feet
Walk glorious over heaven's golden
street.
Or soar on wings.

USING GRAPEFRUIT

Grapefruit may be served as the first course for a dinner of luncheon. Cut grapefruit in half, remove core and seeds, fill space with sugar

By Frank Parker Stockbridge

SAFETY

Next month a great "motorcade" will travel to New York City. It will be composed of drivers from all of the 48 states. Each will have been chosen to represent his or her state because of proven skill as a driver. No one can be selected who has not had ten years of driving experience, covering at least 50,000 miles, and his accident record must show a clean slate.

These 48 motorists, representing the very pick of all the drivers of America, are to converge upon New York in August for a highway safety convention, sponsored by the C. I. T. Safety Foundation and co-operated in by the American Automobile Association and the National Safety Council. Prizes will be given to the drivers who come the longest distance and arrive without a scratch on their fenders.

This seems to me like a mighty social move toward dramatizing the importance of careful driving, it ought to stimulate public interest in the effort to make motoring safe.

SHIPS . . . our program "The Gridiron Flag" of the United States will first again on the seven seas as it has not been seen since war days, if the purposes of the new ship subsidy bill, passed in the last hour of Congress, are carried out. In this new law a Federal Maritime Authority was set up, with power to subsidize and supervise the construction and operation of American ships for the foreign trade. Two hundred new ships in seven years at a cost of \$350,000,000 is the building program. I would like to see it even bigger.

The new law also provides for subsidies to ship operators to equalize the difference between wages paid to American officers and sailors and the starvation wages paid by ship owners of other nations.

I hope one result of this will be to fill American yachts again with the desire to go to sea, and that Old Glory will again become a familiar sight in every seaport of the world.

DROUGHT . . . Irrigation. A friend who lives in northern Tennessee wrote me the other day that it had not rained in his part of the country for 77 days. Drought conditions that threaten the wheat crop and the cattle ranchers are reported from many parts of the northwest plains and prairie states. Along the Atlantic Coast the shortage of rain in April and May and early June wrought havoc with the growers of vegetables and small

and chili; prepare several hours before serving. When ready to serve add two or three maraschino cherries and one tablespoon of the liquid. Serve halves of grapefruit sprinkled with shaved maple sugar; maraschino cherries (halved) may be placed around the edge or halved red and green grapes placed alternately.

Remove the pulp, sweeten and serve in tall glasses with shredded

fruits and about the price of potatoes up to a new high record.

What with floods and droughts, nature has its own way of regulating agricultural production. I don't know how long it took the Egyptians and the ancient Babylonians to develop their systems of irrigation, but sometimes I think that agriculture can only be conducted where it rains all the time, or in one where it never rains at all—with irrigation.

HOMES . . . right basis. There is more common-sense in what Lewis H. Brown told the New York State Bankers Association about the housing situation, the other day, than in anything I have read or heard on the subject.

Much of the distress caused by mortgage foreclosures on homes, he pointed out, arises from three principal causes. The home owner was high-pressed into buying a home beyond his means; he financed the purchase by a short-term mortgage which fell due at a time when he could neither pay nor renew it; and the house was poorly built and fell into disrepair prematurely.

Mr. Brown is no advocate of government financing of home building. He believes that it is up to the bankers of the nation to finance the home owner on long-term amortizable mortgages, easily within the borrower's means to repay, but first to make sure that he is not buying more of a house than he can afford, and that it is a sound, well-built house to begin with.

I have long thought that that is the only sound road toward recovery in the building trades.

TAXES . . . end of line. I have been studying the revenue act of 1936, passed in the closing hours of the 74th Congress. It proposes to raise \$800,000,000 a year of new revenue by a new plan of taxation—on corporate resources. If it does that it will cost every one of us who earns a living a little over four cents a day; for nothing is more certain than this, like all other taxes, will be passed on to the ultimate consumers, who are us.

We who earn the money pay the taxes. We pay most of them to the involuntary tax collector, the retail merchant. Concealed in the price of everything we buy are all the taxes paid by the producer, manufacturer and distributor all along the line. They pass their taxes on to us. The parade ends in our pockets. We can't pass them on. We are at the end of the line.

cocoanut on the top.

Remove the pulp and pour hot chocolate sauce over it just before serving.

Remove the pulp and use with equal parts of orange pulp and white grapes (peeled, seeded and cut in halves); sweeten to taste; maraschino cherries may be added if desired. Serve in tall glasses.

Hew's Your Subscription Label Read

A Parable . . .

A certain man had a furnace and his house grew cold. Said he to his furnace:

"Not another lump of coal do you get till you give more heat"

. . . THE POOR NUT FROZE . . .

—and so did the merchant who cut down his advertising budget to "save expense".

RED TURNIP BEETLE OF THE PRAIRIES

Red turnip beetles and their grubs feed almost exclusively on plants of the mustard family. Beetles may be found on other types of plants and may feed to some extent on their flowers. Serious damage is caused to such garden crops as turnip, radish, and cabbage, and to ornamental plants such as phlox and alyssum. Red turnip beetles breed principally on weeds, such as the mustard, peppergrass, frenchweed, and shepherd's purse. The beetles are common also on native plants, such as a prairie wallflower. Outbreaks may occur in any part of the park belt and the adjacent margin of the prairie.

The easiest, cheapest, and most effective control, states K. M. King, Dominion Entomological Laboratory, Saskatoon, is clean cultivation of the garden and its surroundings, to keep them free from weeds of the mustard family. This is particularly important in the early spring before the garden is planted, and also during July and August when the beetles are laying their eggs. Radish, turnip, and cabbage patches should also be cleaned up and the refuse burned as soon as the crop is removed. Where such clean cultivation is practised, combined with occasional spraying when the pest threatens to become troublesome, the beetles will be kept in check very readily. Putting garden plants of this sort only on land that was clean followed the preceding summer is also a very helpful practice. Pulling tillage sufficient to cover the eggs is said to be effective by preventing their hatching.

Both grubs and beetles may be readily killed by spraying or dusting the affected plants with Paris green or arsenate of lime. In dusting the plants, the Paris green should be mixed with 15 or 20 parts of some fine dust, such as slaked lime dust (or clean flour or oolong dust). Arsenate of lime is equally effective and, if available, is cheaper. It is used at the rate of one part to 10 or 12 parts of the diluting dust. This mixture is dusted on the plants by means of a chambered bag, or a wild can with a number of very fine holes punched in the bottom. The application is best made in the morning when there is a small amount of dew on the plants. It is important

that the dusting should be done when the air is calm and should be applied at intervals of a week or ten days. The weeds in nearby fields should also be treated to prevent repeated migration of the beetles into the garden.

There is only one generation of the beetle each year. Both the beetles and their grubs somewhat resemble the corresponding stages of the Colorado potato beetle, but are easily distinguished by the difference in appearance as well as by the fact that neither species attacks the food plants of the other. The red turnip beetle is oval, a little more than 1 inch long and of a dark red colour with black markings including three distinct black stripes down the back.

DISEASE RESISTANCE IN PLANTS

Disease resistance in plants appeals to Canadian farmers great possibilities towards reducing the loss and inconvenience due to destructive plant diseases; nor is this interest, subject of recent origin, for one authority in 1884 states that improvement in the quality of potatoes with respect to disease resistance might be accomplished by a process of plant breeding.

By disease resistance is meant the ability of plants to resist attacks of disease-producing organisms such as fungi and bacteria. This quality may be complete, partial or absent. Complete resistance implies true immunity as illustrated in the case of Irish Cobbler and Green Mountain potatoes which are immune to the disease known as wart or canker. Partial resistance is illustrated by the ability of certain varieties of potatoes to produce leaves and stems resistant to blight while the tubers may be extremely susceptible to the disease. Still more striking is the case of the Katahdin potato variety known to be immune to mild mosaic yet it may contract other forms of mosaic as well as leaf roll and spindle tuber.

Acquired immunity or an escape from disease, may be confused with what is termed true immunity for plants may avoid infection because of factors related to climate or seasonal conditions unfavourable to the parasite. For instance, in certain sections of Eastern Canada, particularly in Prince Edward Island, wheat frequently escapes the ravages of rust simply because the crop is hard.

vented before the occurrence of conditions necessary for rust development.

Farmers and gardeners will learn with great satisfaction that definite progress has been made in the production of a number of economic crop plants resistant to important diseases. One cannot refer to this matter without mentioning the recent advances towards securing wheat varieties resistant to rust, an accomplishment credited to the personnel of the Rust Research Laboratory in Winnipeg, Manitoba. Further advances have been made in securing turnip varieties resistant to club root, as demonstrated by recent tests revealing that certain strains of the Wilhelmshager variety may be grown with safety on land contaminated with the club root organism.

POISON IVY AND RELIEF FROM STINGS

"Poison ivy is more prevalent in summer and summer tourists and cottagers would be well advised to acquaint themselves with the plant itself, and with the remedies for poison ivy," say officials of the Health League of Canada.

The plant may be found growing in a variety of conditions and can be recognized from the leaf formation which is arranged in threes, similar to the strawberry plant. Unlike the soft strawberry leaves, the ivy leaves are smooth and somewhat leathery in appearance.

The irritating oil from the plant produces inflammation of the skin which spreads from one part to another by rubbing and scratching. It is important, therefore, that no itching applications be used such as cold boracic solution, cold opium salve and the astringent effect of a weak sugar or lead solution is also beneficial. Isolated patches of poison ivy inflammation may be painted twice a day with a one per cent solution of potassium permanganate, this stains the skin, but the stain may be removed by gently scrubbing with soap and water.

ALBERTA SHOWS 50 P.C. LOSS FROM DROUGHT

The crop report by the Bank of Montreal notes that the prolonged intense heat with inadequate moisture has caused further serious deterioration to crops in the prairie provinces. Recent sections of wheat and thunderstorms have been beneficial in some sections and temperatures are now moderating. A large percentage of the wheat is headed and good general rains are imperative to aid filling. In Quebec crops are making good progress and have benefited considerably from recent warm weather and rainfall, with only a few small areas showing any ill effects.

effect from heat or lack of moisture. Throughout Ontario the unprecedented sustained heat-wave with high temperature records has caused considerable crop damage. Rain in the Maritime provinces, warm weather and showers have been favourable to growth and all crops have progressed satisfactorily. In British Columbia growth has been satisfactory and in general, fair to good yields are being obtained with the exception of berries, the yield of which has been poor.

Crops in Alberta are deteriorating rapidly and general rains are urgently required. Southern and east central sections are suffering most seriously and 50 per cent to total loss is expected in this area. A large proportion of the wheat is headed but the growth is short. Coarse grains and pasture generally are poor, while irrigated sugar beets are slightly above average.

In Saskatchewan crops generally are suffering seriously from severe hot weather and apart from a few districts in the central areas precipitation has been inadequate. In the southern sections major irreparable losses have occurred and a shortage of feed is imminent in a number of districts.

In Manitoba crops have shown further deterioration from extreme high temperatures particularly in the southern sections. Rainfall has been scattered and in most cases ineffective. Growth is stunted and heads generally are short.

SURPRISING FACTS ABOUT YOUR TEA

Now that the warm weather is bringing leaf tea back into popularity, I decided to ask an expert just what tea is. I learned some surprising facts.

"All tea—black, green or oolong—is the same on the bush," said the expert, Robert A. Lewis, the specialist who is a member of the United States Tea Board. "Grocers' shelves hold many kinds of tea, but before the tea is 'manufactured,' it is tea.

"Most people," said Mr. Lewis, "know that there are green teas and black teas but they think of them as entirely different species of the tea plant. This is not the case for the tea plant wherever it grows is the same. Green tea and black tea may be produced at will from the same bush and are merely the result of manipulation in manufacturing. In spite of the fact that the tea plant grows in many climates, the result of production all leaves when plucked from the bush are green. The difference in tea leaves on any one bush is that some are tender and some are tough. Naturally tender tea has better quality.

"Green tea is a product largely of Japan. Immediately after plucking the green leaves are steamed to seal the pores and set the natural green color.

House of Hazards

By Mac. Arthur

The leaves are then dried over charcoal fires curled and prepared for shipping. Because of the lightness of the color of green tea people think it is impossible to make it strong. However the strength has little to do with the color for green tea may be made to any required strength.

"India, Java and Ceylon supply black tea. It differs from green tea only in the process it goes through after plucking. The leaves are taken to the tea factory, withered and rolled. They are then fermented, and it is this process which gives the tea its dark or black color.

"From the island of Formosa comes the Oolong tea. It is neither black nor green but a semi-fermented product half-way between the other two best known kinds. China also

supplies both green and black tea, while Sumatra is coming forward in the production of black tea. All commercial varieties of tea, such as Orange Pekoe and English Breakfast, belong in one of the three general classes of black, green and oolong."

Mr. Lewis speaks with authority because he has tested tea for Chase and Sanborn for 36 years. He points out that although tea is alike on the bush, there are many grades and the

quality of the product depends to a considerable extent upon the climate and soil where it is grown. The United States excludes all inferior grades through the services of the Tea Board. As a result, the tea in this country is of high quality.

The thickness of iron and steel plates can be measured by a newly invented magnetic instrument even when only one side of the plate can be seen.

ABOUT PAIN, HERE AND THERE

Almost every active human being is subject at one time or another to fleeting, shifting twinges varying from slight discomfort to severe, pronounced pain. Such may not be accompanied by any inflammatory signs—heat, redness, or swelling—just transitory pain, often mistakenly called "muscular rheumatism."

Such annoyances almost invariably come from disturbed nerves. Organs adjacent to the locality complained of should be studied. Constipation—an impacted bowel—may cause anything from head neuralgia to sciatic irritation, and even pains in ankles and heels. Unload the bowel and relief comes. All pains in nerves should be investigated as to local injury. Grains of sand or a heavy rock yesterday today he has a sharp pain in her wrist. You "turned" your ankle last night on an uneven sidewalk.

Little disturbances due to injuries may be treated by hot fomentations, heat and medicaments rubbed on. Good liniments are very useful if persisted in. It is possible that no cause for a localized pain can be found. In such case the physician is a timely resort if the pain does not disappear after rest and heat. A lazy liver may produce pain at point of shoulder blade and elsewhere, to disappear of itself after eating fruit. Most of the fleeting pains in the lower extremities are produced by trouble in the organs within the body, unless local injury has occurred. "Diffuse neuritis" is a warning that demands the physician.

Designed in sizes 32, 34, 36, 38, 40, 42 and 44. Size 34 requires 3 1/2 yards of 35 inch material. PATTERN FOR ALL OCCASIONS. Patterns \$8.00. Good enough to play hostess good enough to make calls and not too uppity to go to market in this very delightful all purpose frock. It's easy to make with the caplet sleeves and shawl yoke cut in one piece and the close fitting neckline is flattering to everyone. The waist is gathered at the yoke, front and back to give that soft fullness so necessary. The simple, gently flared skirt is most graceful and offers a balance to the slightly wider sleeves with inverted pleats. Almost any seasonal fabric will fill the bill, and fortunate indeed will be the lucky lady who claims this fetching frock for her summer wardrobe.

For Pattern, send 15 cents in coin (for each pattern desired your NAME, ADDRESS, STYLE NUMBER and SIZE to Patricia Dow, (Wainwright Star) Pattern Dept., 115 Fifth Avenue, Brooklyn, N.Y.

SLIGO

A large crowd gathered at the Rosedale United church on Friday to pay their last respects to Mrs. Gilbert Sr., who passed away at the Wainwright hospital on Wednesday last. Mrs. Gilbert was one of the old-timers of this district and was respected by everyone with whom she came in contact.

Best wishes for a speedy recovery are extended to Miss Geneva Zafko who underwent an operation for appendicitis in the Wainwright hospital on Wednesday last.

Congratulations are extended to Mr. and Mrs. Tom Walworth who were married on Tuesday, July 14th.

Miss M. Murdoch was down from Vining to attend the wedding of the former Miss Kathleen Knott.

Mrs. A. M. Postema came home from the Wainwright hospital on Sunday last.

Miss Hattie Empey is here from Vancouver and is spending her holidays with relatives.

An experimental sub-station is to be established north of Davidson in Central Saskatchewan. There are already 25 of these stations in the province for the testing of grain and grasses under different methods of cultivation.

HOPE VALLEY

A large number from this district attended the funeral of Mrs. W. Gilbert on Friday afternoon. The deceased was well known and beloved by many, and her passing is deeply mourned by all. We extend to the bereaved family our sincerest sympathy.

Mr. W. H. Roach is enjoying a week's holiday at Fernholm.

We are glad to report that Mrs. Duff Moore is progressing as well as can be expected after her recent operation.

Mrs. Ian McPhie and little daughter returned to Edmonton this week after spending a very pleasant visit with her parents and friends here. She was accompanied back to the city by Master Jim Sewell who will spend several weeks at his sister's home.

Dr. and Mrs. Rublee and family of Allan, Sask., were guests of Dr. Rublee's brother Mr. C. Rublee for a few days.

A meeting was held in Giles school on Tuesday evening to organize for special roadwork on the other side of the river, with a view to shortening the trip to Paradise Valley.

Quite a crowd from here attended the Gilt Edge picnic on the 15th. Both the Sports Club and the Maple Leaf Club ball teams were defeated by the Auburndale team.

Mr. and Mrs. Albert Boyer's wedding dance in Giles school on Friday evening proved to be a grand success. Everyone had a good time, and the crowd was an indication of the esteem in which the young couple are held.

William James and Mike Treflak are away on their summer's outing.

The date of the next Lutheran service in Giles school is to be announced at a later date.

Stafford James of Kitchissippi was visiting at his home on Friday last.

Tom Key and A. L. Lines returned Thursday from a trip to the vicinity of the Cold lake district.

MAYFIELD

Master David Melvin of Vermilion is visiting his aunt, Miss A. Penning.

Miss Irene Goodkney spent the past week the guest of Beulah Armstrong.

A large number of cars keep wending their way to the river for saunas. The berries are not so plentiful this year.

Beulah Armstrong is holidaying with Ruth and Inez Harden.

SYDENHAM

Mrs. Glenn left on Monday for Ontario, where she will spend a few weeks visiting with friends and relatives.

Miss Janet Croleau is spending her holiday at the home of Mrs. J. Bannala.

Mr. and Mrs. W. G. McKay and family were visiting on Sunday at the home of Mrs. Glenn.

Mr. and Mrs. J. Gregson were visiting in the district on Tuesday.

Mr. J. St. Peter is spending a few days in Edmonton.

A much needed rain fell early Saturday morning in this district doing much good to the dry, parched crops and gardens.

The famous mineral springs of Bath, England, produce 500,000 gallons of medicated water daily.

Bloomington Valley

Mr. D. Cooke, Mr. C. Tunney and Mr. G. Crowell, motored to Marwayne for a visit.

Mr. J. Buchanan is working for Mr. G. Nowell.

Rev. J. Stull preached his first sermon at Bloomington on Sunday.

Mr. G. M. McGilvray has returned from a visit at Cold Lake.

Miss M. Krimbil has returned home from work at Mr. and Mrs. Bazley's.

HEATH

Among those who spent the weekend fishing at Arm Lake were Mr. and Mrs. Arthur Nelson and family of Metlakow, Mr. and Mrs. Harold Furdie and relations of Irma, Mr. and Mrs. G. T. Broemeling and the Misses Mildred Broemeling and Gladys Hansman and Mr. and Mrs. Alfred Schug of Provost.

Mr. and Mrs. Bill Spornitz and family of Heath are camping at Clear Lake for a week. Quite a party of their relations from Edmonton were visiting with them on Sunday.

The St. Patrick's W.A. of Heath are holding a social evening at Heath Wednesday, July 22nd. Coconut alys and other attractions.

Mr. Orrin Davis has returned to Marwayne after spending a few days with his parents.

Mrs. Pearl Carr and Irene were visiting with her parents and attending the Mission Conference. They have now returned to Camrose.

Mr. and Mrs. Bauer and family of Ranfurly were visiting Mr. and Mrs. Atkins at Heath over the weekend.

GREENSHIELDS

Mrs. E. E. Jackson returned home Sunday from the coast. Mr. E. E. Jackson and family met her in Edmonton.

Mr. and Mrs. Douglas Moreau held their wedding dance Friday evening last.

Mr. and Mrs. "Duke" Ott returned home from their annual two weeks holiday recently.

Mr. and Mrs. W. Jackson and family returned home from the Edmonton exhibition Sunday.

A new road to Wainwright along the south side of the track is now under construction.

Misses M. and R. McEure of Edmonton are visiting at the home of Mr. and Mrs. L. Carl.

Mr. and Mrs. E. Harrington left Monday morning to visit relatives at Clive.

Mrs. R. Bond of Edmonton is visiting her husband for a few days.

The annual picnic held by the Young People's Club will be Wednesday, July 22nd, at Wilcox Lake.

DID YOU EVER STOP TO THINK?

Frank Carrel, President of Quebec (Canada) Chronicle-Telegraph says:

"It seems to me that the depression has caused more of our business men to dig deeper into the administration of their own particular businesses."

"On the subject of newspaper advertising many authorities have become convinced that more money has to be spent in advertising the public on general business methods, ethics and expansion."

"Bankers must inform the public all about banking, insurance men all about insurance and financiers all about finance. Possessing a bank account, carrying an insurance policy or buying and selling securities is only the crust of these big developments in our commercial life."

"The expansion of business through educational campaigns is one of the bright spots in our trade revival and will be effective in asking all other lines of commerce."

AMONG THE OLD-TIMERS

"REMINISCENCES OF OTHER DAYS"

20 YEARS AGO

Miss Leonie Garneau passed away at the home of her brother, in-law, Mr. Ed. Garneau, in the Gilt Edge district, at the age of 63 years.

The largest wool sale to date was held at Lethbridge on July 19th, when 600,000 pounds of wool were offered for sale; buyers being present from all over the continent. The clip came from sheep raised on the ranches of Southern Alberta.

Mrs. J. McCann and family have returned from a six-weeks' visit with friends and relatives in Minnesota.

James Whitcomb Riley, the poet, passed away at his home in Indianapolis, last week, after suffering a stroke.

The new weigh office of Mr. S. D. Miles, on the corner of Queen's street and Third avenue, was this week brought to completion.

Mrs. M. Neild arrived in town on Saturday from Edmonton to fill a position in the station restaurant. The Town Council has set the mill rate for the coming term at 30 mills on the dollar.

Photographers have at last been successful in obtaining a picture of Niagara Falls at a close range; these beautiful pictures were taken from the deck of the ship "The Maid in the Mist" which sailed right to the foot of the Canadian Horseshoe Falls at Niagara.

SWIMMING DON'TS

DON'T swim alone. You may become fatigued and no one will be available to come to your assistance in case of difficulty.

DON'T swim for at least an hour after eating. If you do you may be stricken with stomach cramps, which in almost every case render the swimmer helpless. Muscle cramps are not so dangerous and in most cases of these, providing you do not get excited, you can get them out by relaxing. Make for the shore at once where the cramped member can be massaged. If you are subject to cramps stay close to shore on all occasions.

DON'T go on long swims unless accompanied by a boat.

DON'T forget that it takes as much ability to be able to swim in water five feet deep as it does in much deeper water, and that it is much safer to swim in shallow water because you can always rest when tired.

DON'T dive into water unless you are sure it is free from obstacles and of sufficient depth for diving. DON'T use inner tubes to learn to swim or to play on. They may slip away and let you sink in deep water.

DON'T use rafts. They may carry you out beyond your depth or a ball or anything else being blown out from shore by the wind or current. It can travel faster than you can and you may become tired and be unable to swim back to shore.

DON'T climb out on rock piers. They are often very slippery. You might fall and break your neck or seriously injure yourself.

DON'T cry for help if it is not required. You may need help some time and then nobody may pay attention to your difficulties.

DON'T get into a canoe unless you are an experienced swimmer or boatman. Never stand up in canoes, or small boats, or charge seats, nor move about in unnecessary manner. This is the most dangerous thing you can do and more accidents happen through this form of carelessness than from any other cause.

Softball and bridge have been elevated to the "fine arts" by Vancouver's public library. The library's latest report lists a book of official rules of softball and a book of bridge under the fine arts section, along with such intricate hobbies as hand-loom weaving and metalcraft.

Musical instruments used by the Chinese are drums, cymbals, horns, lutes, castanets and flutes. There are three varieties of bells—po-chung, te-chung and pin-chung.

FOR REASONS WHY

You should buy a **Frost & Wood Binder**

The Binder of few repairs and long life—Over fifty years experience in Binder construction.

Ask any user of Frost & Wood. They know.

Call in and get prices on good RE-POSSESSED BINDERS—You CAN SAVE MONEY.

Now is the time to let me re-condition your old mower of any make or better still trade in for a new Old Bath Frost & Wood.

GUY TORY

BLACKSMITH & COCKSHUTT DEALER

Best Repair Service in Town

OPEN FOR BUSINESS 24 HOURS A DAY

10 YEARS AGO

According to word received, the Fabyan Petroleum ad under the direction of Field-manager Williams and Messrs. Allison and Adams, are ready to begin drilling operations on the aptly-named "Mystery Well."

Mr. W. Hetherington of the Auburndale district is erecting a new up-to-the-minute home on his farm.

The Battle river near Fabyan this week claimed two victims in the persons of Mr. D. A. Fairfield aged 39, and his daughter Isabel aged 10. The little girl was playing on a raft near the shore, when she fell into the water. Her father made a desperate effort to rescue her but being unable to swim, was overcome. The two bodies were later recovered by neighbors.

Messrs. J. W. Stuart, D. W. Davidson, and L. E. Bean and families returned this week from Laurier lake with a nice load of fresh nair.

According to tourists passing through town, the crops around Wainwright are the best to be seen for miles.

The new up-to-date rotary drilling rig purchased by Davey Credit in California for Anglo-Alberta Oil Ltd., has arrived in town and the men are all busy getting it set up and ready for operations.

The fifteenth annual picnic of St. Luke's (R.C.) church held on Wednesday at Mott Lake, proved to be a very enjoyable affair. A large crowd was in attendance and all did full justice to the chivalrous supper as well as the ice cream and other treats served. A big dance was held in the Elite theatre in the evening.

Messrs. R. Dunsmore and J. Stuthery and their families left this week for a holiday at Cold Lake where they intend to do some fishing.

FIGURES IN THE EMPLOYMENT SITUATION

According to data published by the Dominion Bureau of Statistics from 9,690 firms throughout Canada, there was a considerable expansion in employment at the beginning of June in which most industries showed a marked increase.

The payrolls in these enterprises were enlarged from 910,218 at May 1 to 963,513 at the beginning of June, or by 23,295 persons. Statements had been received from 9,270 employers of 915,792 persons on June 1, 1935. The index at the latest date stood at 102.9 as compared with 99.5 in the preceding month, and 97.6 at June 1, 1935.

Although the increase at June 1 was substantial, and exceeded the gain noted at the same date of last year, it was smaller than the average advance indicated between May and June by the experience of the years since 1920. The index after adjustment for seasonal variation, therefore, declined, falling from 102.4 at May 1 to 100.5 at the latest date.

Improvement was reported in manufacturing, particularly in the food and lumber divisions. In the non-manufacturing industries, there were important increases in logging, mining, communications, transportation, highway and railway construction and maintenance, services and trade. On the other hand, building construction was not so active.

Texas Guns

By L. P. HOLMES

SYNOPSIS. Silas Spelle, high-handed, low-principled cattle larcenist, is out to smash the local bank and force foreclosure on the small ranchers of the Kansas desert country so that he can seize their range lands. He is opposed by Ed. Starbuck, president of the Cattlemen's Bank and by San Juan Delevan, prominent rancher who has been crippled by a fall from his horse. Johnny Clehe and his partner, Tex Whipple, are cowpunchers employed by San Juan Delevan to fight the rustlers and protect his interests.

"Mama," chirruped Johnny, nowing on his knuckles. "That was shore a satisfaction. I been itchin' to do that all mornin'."

"Hah-hah!" chuckled Tex coldly. "Yuh shore rung up a bulls-eye that time, kid. Go on, Pink, yuh stick to Miss Ronny."

Spelle was gulping with fury and dismay. While Lange had been unable to finish his statement he had let out enough to advise Spelle that something was radically wrong concerning the Delevan mortgage. In his thwarted greed a modicum of courage returned to him and he advanced threateningly into the room.

"What's this?" he raged. "What is this about the Delevan mortgage?"

"Nothin' much," drawled Tex. "Ceptin' it's paid in full."

HOUSEFLIES

Houseflies breed only in manure,

principally horse manure, but also in

pig manure, and in open privies.

They very rarely breed in cattle

manure. The flies feed on practically

everything that is objectionable and

often dangerous and, in addition, on

food which we intend to eat our-

selves. In feeding, they always wash

a little of their last meal on to the

food they are about to eat. You are

justified in hoping that a housefly

which settles on your dinner ate

something clean for its previous

meal, but it is rather improbable

that it did so.

Control of Houseflies. Scatter

horse manure as frequently as possible

on fields. Do not allow it to

accumulate in heaps.

Use chlorine of lime, or better

still, a solution of 1 lb. borax in 3

gallons of water. Freely in all out-

door privies. These are the most

sure sources of infection from

which flies spread typhoid and

dysentery.

was hard shooting, twisted this on a running horse, but the following band made a big mark and at the fifth shot a horse went heading, throwing its rider spread eagled into the dust.

"Buono," cried Tex. "That slowed 'em up."

"Yeah, for a minute," answered Johnny, feverishly plugging more shells through the loading gate. "But they're gonna spread out. Somebody's usin' his hand back there."

"Nemmine, Pink's almost out o' sight and that's the main thing." As Johnny had said the pursuers had spread out and no longer presented a solid mass to shoot at. From now on any fire Johnny might give through his rifle would merely be haphazard with chances for a hit very small, at least while his own horse was in motion.

The dull thudding of gun-shots sounded in the rear but only one lone bullet sang past Tex, quick to read this sign smiled grimly.

"Lucky for us they ain't any o' them got Winchester. They can plug away all day at this distance with their six-guns without doin' us harm. Kin yuh see Pink?"

"Nope. Plumb outta sight. Reckon we done put a crimp in Mister Spelle today, Tex."

"Then Johnny gave a yell of alarm. 'Look at comin' in ahead an' on the southwest, from the rim of the desert. Two riders comin' in to fight us. Now how'n hell did they git up there?'"

Tex turned and followed Johnny's pointing arm. Sure enough two riders were spurring in at an angle to the southwest, from the rim of the desert. They were coming fast on big, gaunt horses and each of the riders carried a rifle loose in their right hand.

"Hell," snapped Tex. "We're in it, kid. Pull up. You got after those two humpers with the rifles, I'll keep this other gang back. My ole hawk-leg will throw lead just as far as theirs. Now let's see yuh do some o' that high-toned shootin' yuh've been braggin' about."

"If yuh'd only pack a Winchester!" wailed Johnny as they drew their plunging broncos to a halt. "But yuh're so chock-bull-headed yuh never will. Jest think what yuh could do with a 30-30 now."

"Nemmine me," snapped Tex. "Get busy those two jaspers are within range."

Johnny slipped from his horse and threw up his rifle. It wavered, steadied, but when it crashed flatly, the bullet went far and wide. Just as Johnny pulled the trigger, Tex had leaned over and swept the barrel up

screaming to earth and the rest broke and rode back out of range where they gathered in a cove, of war, it did not take them long to realize that this time they were out-manuevered, for they saw Tex spur out to meet the newcomers and their hands delightedly. Two more rifles added to Johnny's deadly one were too much to face so they turned and rode back toward Carillon with their heads.

Utah Lynch, lank, dark-faced, astute, chuckled grimly as a shame-faced Johnny pumped his hand.

"Kid," he drawled. "Yuh ain't forgot how to throw a lot o' mean lead, have yuh? I kinda thought yuh was goin' to open up on me an' Al."

Al Burrows, chunky of body and craggy of face grinned and spat emphatically. "By golly yes," he chimed in. "Tex, this dang cub o' yore is shore developin' his claws."

"Yeah," nodded Tex, his eyes twinkling. "He's gettin' to be mean medicine with a Winchester. Trouble is his brain ain't developin' as it should. If he could think as fast as he can shoot he'd be all right."

"Aw-gwan," asserted Johnny. "Wouldn't it been no loss if I had leaded yuh two ole highbenders. Jest the same I'll admit. I was glad to know I was friends droppin' in. How's Bud an' Barbara an' Nevada an' all the rest o' the gang back at the ole Bar B?"

"Piner 'n' frawg's hair," grinned Utah. "They's a new boss at the spread now. Bud, the second."

"New?" exclaimed Johnny delightedly. "I'm tellin' yuh," Utah nodded. "Pattee, happiest lil' geezesh yuh ever saw."

"That's shore fine, Tex, me'n yuh gotta take a trip some day an' look in on that young gent."

"Mebbe so, someday," drawled Tex. "But right now we got our own dish o' hash to cook. Boys, yuh shore dropped in at the right time?"

Utah nodded. "Looks thataway. Hell, it's all about. Tex? When Al an' me got them telegrams we took 'em to Bud an' told him we was driftin' down thisaway, pronto. Bud shoofed us off on the run an' told us to let him know if yuh needed us."

"To let him know if yuh jest were him an' he'll come afoffin' in with the whole outfit."

"Reckon that won't be necessary," said Tex. "But shore I'm thankin' Bud for feelin' so. Now let's ambles along. I'll tell yuh feller the story while we ride."

By the time they rode up to the corral of the Box D ranch Utah and Al had the whole story and had joyfully expressed their satisfaction at the opportunity of sitting in at things. When Tex attempted to thank them for their prompt response to his messages they waved him off.

"Why thank us?" scoffed Al Burrows. "Shucks, Tex, we're the ones to render thanks. After yuh and Johnny left our neck of the woods things got so durned quiet that an' we began to mope. This looks, as one swell chance to take the kinks outa our trigger fingers an' keep up our eyes a little."

"You danged ole war-dozers," chuckled Tex. "Pink Crosby and Pod Fortune unhooking a pair of meek, sweating broncos from the backwood when the four riders drew up. After introductions were over Tex turned to Pink with twinkling eyes.

(Continued next week)

HOUSEFLIES

Houseflies breed only in manure, principally horse manure, but also in pig manure, and in open privies. They very rarely breed in cattle manure. The flies feed on practically everything that is objectionable and often dangerous and, in addition, on food which we intend to eat our-

selves. In feeding, they always wash a little of their last meal on to the food they are about to eat. You are justified in hoping that a housefly which settles on your dinner ate something clean for its previous meal, but it is rather improbable that it did so.

Control of Houseflies. Scatter horse manure as frequently as possible on fields. Do not allow it to accumulate in heaps.

Use chlorine of lime, or better still, a solution of 1 lb. borax in 3 gallons of water. Freely in all outdoor privies. These are the most sure sources of infection from which flies spread typhoid and dysentery.

Hints for the Household

Conducted By Betty Barclay

PICNIC BASKET SURPRISES

- Nut Bread
- 3 cups sifted flour
- 3 teaspoons double-acting baking powder
- 1 teaspoon salt
- 2/3 cup sugar
- 1 cup chopped nut meats
- 1 egg, well beaten
- 1 cup milk
- 4 tablespoons melted butter or other shortening

- Sift flour once, measure, add baking powder, salt, and sugar, and sift again. Add nuts. Combine egg, milk, and shortening; add to flour mixture and blend. Bake in greased loaf pan, 8 x 4 x 3 inches, in moderate oven (350 degrees F.) 1 hour, or until done.

- Savory Meat Loaf
- 2 thin 2-inch slices salt pork, dried
- 2 tablespoons minced onion
- 2 pounds round beef, ground
- 1/2 cup quick-cooking tapioca
- 2 1/2 teaspoons salt
- 1/2 teaspoon pepper
- 2 cups strained canned tomatoes (juice and pulp)

- Try out salt pork, add onion, and cook until golden brown. Add pork, onion, and drippings to other ingredients and mix thoroughly. Bake in loaf pan in hot oven (450 degrees F.) 15 minutes; then decrease to moderate (350 degrees F.) and bake 30 minutes longer or until done. Serve hot or cold. Garnish with parsley. Serves 10.

- Hermits
- 2 cups sifted cake flour
- 2 teaspoons double-acting baking powder
- 1/4 teaspoon salt
- 1/4 teaspoon shortening
- 1/4 teaspoon cinnamon
- 1 teaspoon mace
- 1/2 cup butter or other shortening
- 1/2 cup brown sugar, firmly packed
- 1/2 cup granulated sugar
- 2 eggs, well beaten
- 2 cups raisins

- Sift flour once, measure, add baking powder, salt, and mace, and sift together three times. Cream butter thoroughly and sugar gradually, creaming until light and fluffy. Add eggs and beat thoroughly; then raisins and nuts and mix well. Add flour gradually, mixing well. Drop from teaspoon on greased baking sheet and bake in moderate oven (350 degrees F.) 15 minutes. Makes 4 1/2 dozen hermits.

- The picnic season is off again as we scurry to hills and country side for an old-fashioned "spread". Under the trees a feast is laid, sandwiches spilling from boxes, deviled eggs, pickles and all sorts of eatables. The real picnic is "mostly victuals". Its traditions demand a full hamper, big appetite and joyous informality.

- Today the box-lunch is the hot-weather picnic meal, but "best" is not enough for ravenous appetites unless it is bolstered up with a hearty drink. The best way to top off a "spread" is with beer—home-

made ginger beer for the children, and a can of beer for the adults, such as Ballantine is putting out—easily carried in the lunchbox. Grated ham, chopped nut, and cheese are eaten after the swim and are easily digested when accompanied by a foamy beverage. Delicacies like lamb's tongue, olives, stuffed tomatoes, and cole slaw can be piled from thermos jars and are free of scorching heat.

Cold dishes are very good, but the modern picnicer demands hot food, too. "Not many people know how to cook steak outdoors," he states. Here's a treat for the head of the family at an old-fashioned, modern picnic:

Broil 1 thick Porterhouse steak, cut in slices, over a fire until the

jucos run slowly. Each picnicer may cook his slice on a forked prong, or the whole steak may be broiled on a grill. Season the steak on both sides, rub with butter, catching the juice in a pan underneath. When the steak is about done, pour over it the juice and 1/2 can of Ballantine beer. Lump the meat delicately between the upper and lower halves of a flat roll.

Chocolate Walnut Dollars

- 2 1/2 cups sifted cake flour
- 2 teaspoons double-acting baking powder
- 1/4 teaspoon salt
- 1/2 teaspoon cinnamon
- 1/2 cup softened butter or other shortening
- 1 cup sugar
- 1 egg
- 2 squares unsweetened chocolate, melted
- 1/2 cup chopped walnut meats
- 1 teaspoon vanilla
- 2 tablespoons milk

Sift flour once, measure, add baking powder, salt, and cinnamon, and sift again. Combine butter, sugar, egg, and chocolate, beating thoroughly; add nuts and vanilla. Add flour, alternately with milk, mixing well. Place on waxed paper and shape in rolls, 2 inches in diameter; roll each in waxed paper. Chill overnight, or until firm enough to slice. Cut in 1/4-inch slices; bake on ungreased baking sheet in hot oven (400 degrees F.) 8 minutes. Makes 4 dozen cookies.

Other women of China who have received degrees from American colleges are Soong Mei-Ling, wife of Generalissimo Chiang Kai-Shek, Premier of China. She has become the active head of China's military air bureau. Mme. Chiang Kai-Shek is a graduate of Wellesley. She is an ardent flier and has had many years of air experience.

A study of the buying habits of American families is at last being made. The United States Chamber of Commerce, the Social Science Research Council, and many other organizations have been using the Bureau of Labor Statistics to make this study for years. Business, welfare organizations, consumer educators, and government departments have had to rely on a small study made in 1918 for information about standards of living in this country. The present consumer purchasing study is made possible by funds from the WPA and is being conducted jointly by the Bureau of Labor Statistics and the Bureau of Home Economics of the Department of Agriculture. Two women are leading in the supervision of the study. Dr. Faith M. Williams, chief of the Cost of Living Division of the Bureau of Labor Statistics, and Dr. Hildegard Kneeland, chairman of the Economics Division of the Bureau of Home Economics.

Speaking in the House of Commons, Miss Agnes MacPhail, M.P., said: "People think that any fool farmer has to do is to scratch the earth and sow some seed. Actually a successful farmer must be a good administrator. He has to know everything. He must be a good horticulturist, a cerealist, and a stock breeder. Running a farm is no job for an amateur."

Clive Cornwall, astronomy student of Venice, California, constructed a telescope out of automobile parts. It has an 8-inch reflector and is 11 feet long.

</

This Week in Washington

Now that the political observers have had time to get over the emotional effects of the apocryphal and half-baked of both nominating conventions, a survey of the political outlook is possible.

One thing on which experienced onlookers are in agreement, whatever they may say in public, is that the odds are more nearly even between the Republican and the Democratic candidates than a few weeks ago. Any one of a number of things may occur to change this situation, one way or the other, but as matters now stand between the Ins and the Outs, the chances of the Outs getting in appear better, while the chances of the Ins remaining in are not as certain.

Behind Gov. Landon is a united party. The only jarring element is the dissatisfaction of Senator Borah with some of the party's platform plank. Washington observers, however, are beginning to discount the influence of Senator Borah. If he should decide to take the stump for President Roosevelt against Gov. Landon, that would be another matter. Nobody, however, expects him to do that. The Senator from Idaho has always maintained his party regularity in presidential years, even when he has been half-hearted in his support of the party candidates.

Democratic Rift

On the Democratic side there is a rift between the old guard Democrats and the adherents of the New Deal. This rift may grow deeper if any other leaders take their cue from Al Smith, who has publicly "taken his walk." The action of Senator Carter Glass of Virginia in refusing to participate in committee activities was not perhaps entirely a surprise in view of Mr. Glass's frequent outspoken criticisms of the New Deal.

Another factor which may place some odds against Mr. Roosevelt is the new Union Party, headed by Representative Lomke. This movement is being given serious consideration and some political students are concentrating much of their effort upon trying to figure out its probable effect. Some of them contend it promises to draw more votes from the Democratic ticket than it will take from the Republicans.

Offsetting all of these disadvantages, however, the Democratic party has two advantages of incalculable but undoubtedly great value. One is, that the party in power always has the edge on the party that is trying to get in. And the other is the appealing personality of President Roosevelt.

The Platforms

One of the favorite topics of political conversation is the reversal of the traditional principles of the two major parties. By its platform and the utterances of its spokesmen the Republican Party has become the advocate of states' rights while by the same token the Democratic Party has become committed to a government centralized at Washington.

Examination and comparison of the two party platforms on the major issues, which are old age pensions, unemployment relief and agricultural assistance, show differences mainly in method rather than in principle.

The Republican platform for example, accepts the system of Federal grants to states for pensions to the needy aged, and differs only from the system now in effect in proposing to raise funds for this purpose by a direct tax widely distributed. This is interpreted as foreshadowing a Federal sales tax.

On the other phases of social security, which the Democratic platform endorses the Republican platform criticizes the old age insurance and unemployment insurance provisions as leaving out of consideration too large a proportion of wage earners and proposes a revision of the method of administration.

On the matter of relief the Republican platform proposes to return the problem to the individual states with the Federal Government confining its activity to grants of money to the states to help finance their relief programs.

The Democratic platform considers unemployment a national problem, to be met in a national way by work provided for the unemployed at prevailing wages.

Farm Relief Planks

The two parties are farther apart on the relief proposals than in the matter of bonuses to farmers. The Republican platform promises farmers two kinds of bounties, one similar to the bounty now paid for applying soil conservation methods, and a second designed to enable farmers to export surplus products for whatever price they will bring.

The Democratic platform promises the continuation of the present soil conservation bounty, but propose price fixing loans on certain commodities. When all is said and done, however, the issue of the election next November will hinge much less upon precisely what each party promises to do and how it proposes to do it, in detail, than upon the broad question of whether the voters of the United States want to centralize power in Washington or to reaffirm the powers of the individual states.

Involved in that, of course, is the question of governmental expenditures and Federal taxation, on which a large part of the Republican fight is expected to be waged.

And overtopping all of these questions will be, as in every presidential election, the personalities of the candidates, or rather the young public's interpretation of their personalities, as these will be revealed and presented to them in the course of the campaign.

ODDS AND ENDS

An electrical device that illuminates one of 20 routes to tourist attractions when a button is pressed has been installed in the main railroad station in Munich Germany.

A "painless dentistry" chair has been designed by which the patient turns the dent or on and controls the bulb administering the gas.

Electrical research scientists have been able to create artificial lightning which is more powerful than real lightning.

A power-driven circular saw, mounted on a hollow aluminum pole enables one forester to do the work of four men trimming trees with hand saws.

Health Service.

OF THE

Canadian Medical Association

Edited by

GRANT FLEMING, M.D., - ASSOCIATE SECRETARY

SUNBURN

We laugh at aborigines who think that because a teaspoonful of medicine helps them, the whole bottle taken at once should be proportionately more helpful. But can we afford to laugh?

Everybody now realizes that sunburn is healthy; it kills germs and has something to do with vitamins, whatever they are. Therefore let us start, not with a teaspoonful dose, but with the whole bottle.

Sunshine is healthy. We need lots of it and this generation is going to be healthier because of our appreciation of it. Particularly do we need to avail ourselves of the health-giving properties of sunshine in view of our long winter and the consequent need for heavy clothing in this country.

But sunshine gets into our system through the skin and the sun's rays are able to do considerable damage to the untrained skin cells. That is what we call "sunburn" and it may vary from a passing redness to a severe burn with big blisters and blebs, ulceration and fever, and may leave enduring scars. The burn may be similar to that of a forgotten mustard poultice.

Sunburn may be best avoided by gradually increasing the time of the exposure. What counts is not the

area exposed, but the time any one normally covered area is exposed.

Start gradually. Five minutes exposure at noon is an ample start for most people—often too much for very fair people. Except in the case of blondes and other sensitive people, who must proceed cautiously, the time of exposure may be increased to 10 minutes on the second day, 20 minutes on the third day, and then an additional 10 or 20 minutes daily until thoroughly resistant.

Early morning and late afternoon sunshine is not so likely to burn.

Many people think that because it is hazy or there are light clouds, that there is no danger of sunburn. This is not true. Skyshine has about 50 per cent of the power of sunshine.

Remember also that water reflects the sun's rays and the danger of sunburn is proportionately greater on the water.

Some ointments protect slightly from sunburn because of a mechanical interference with the sun's rays. This lessens the beneficial effect of the sunshine, so it is better to play safe and shorten the exposure. Ointment applied later may lessen the burning sensation, but it cannot lessen the degree of sunburn.

Axiom: Don't apply a fortnight's vacation by a first day indiscretion.

The salute was given by all engines, whether running on the line or in the yards, and was truly heard by millions of Canadians.

Grain growers of Western Canada follow the practice of shipping most of the weed seeds and other foreign material harvested with the grain to terminal elevators. This material, in addition to weed seeds, includes broken and shriveled grain, dirt dust and chaff. As cleaned from the grain, these screenings contain a proportion of feed, a proportion of mustards and other unsuitable and injurious weed seeds, and a proportion of waste matter. They are accordingly separated and graded to provide several classes of feed material, and to prevent the distribution in Canada of material which is both unsafe to feed and dangerous from the standpoint of weed distribution.

Instructions were issued from headquarters that the whistles of all engines under steam throughout the National System were to be sounded for one minute at noon on Tuesday, July 21st. All Canadian National shop and roundhouse whistles joined in the salute.

It was at noon on July 21st, 1936, that the "Dorchester," the first engine in Canada, started from Lacombe for St. John, Quebec, hauling the first passenger train over the Champlain and St. Lawrence Railway, the first link in the chain of railways that are now component parts of the Canadian National system. Just one hundred years later the engines of the system echoed the starting whistle of the old "Dorchester."

Research workers of the University of California have demonstrated that tuna liver oil is rich in vitamins A and D and that the proverbial cod liver oil.

If you're a strong type, don't avoid social affairs; a prominent psychologist, Social affairs give you a chance to round out the undeveloped side of your nature. Everybody is a shy, self-conscious

SLAT'S DIARY

Sunday: As I see the stomachmen they are a lot of no-nonsense in this world, but bath tissue is the worst. Last night Ma not only made me take a bath but insisted on washing my neck after wards. It's a tuff life I live. I can't do nothing about it.

Monday: Ma got stopped by a traffic cop in a Ford for speeding and sed to him please let me go I am in a hurry and charge it to my husband's acct. and she got away with it also, with stumps me.

Tuesday: Jane thinks she's smart but ain't. Becos when I sed to her somebody stole my watch she repide. Bergerized the ponshop did they? I bet I get back at her for that crack.

Wednesday: They are 2 ways of telling this is leap yr. 1st becos 1936 is devisable by 4 and 2nd by the way the pedestranes leap out of the way. As the otter whiz past I mean. I beieve the latter is the most plain way of knowen it is leap yr.

Thursday: Got even with Jane for the smart crack about my watch. When she remarked she don't kias all us men she sees I sed I expect it is becos she can't ketch us. I did she slip me a skorrafe book?

Friday: Jake is getting dummer every day. At the partie he butted in on a girls bridge game and whosome game and when I of them sed I am he diddnt do nothing I told Jane it was a good thing it wasnt me and she just left.

Saturday: 1 of are pore girls was a gettin married to a rich yung feller from else where and when I gest of the affair cum in a bizness suite she ast him what did he mene and he repilde and sed I mene just what you do. Bizness I suppose.

THE STAR Wainwright

BRUCE BARTON Says:

Never the Whole Secret

I listened the other day to an illustrated lecture by a celebrated authority on the pituitary gland. To an ignorant layman it was a fascinating revelation. This tiny organ, barely bigger than a couple of peas, is imbedded in the base of the brain, from which point it proceeds to perform miracles of good or ill in human life. A deficiency in its action may produce a giant or a pigmy. Baby rats and pigeons, when an extra supply of its hormones is injected into them, leap into sudden maturity. Lethal children have been put on the path to normalcy by the correction of an under-developed condition of the gland.

One left the room with a bewildered sense of awe. If such immense changes in human personality can now be definitely related to this tiny gland, which was utterly unknown until a few years ago, what more will be discovered presently? Does the whole secret of all that has hitherto been mysterious about men and women lie in this infinitesimal Controller?

Not the whole secret, certainly. There still will be some things to be explained long after the secret of the glands has been fully explored. Immanuel Kant, the philosopher, remarked that there were two things in the universe that provoked his undying reverence—the stars firmament above him and the moral law within him.

What is this moral law? This thing we call spirit or conscience? What was it that caused Socrates to take the hemlock when he could so easily have saved his life? What led Jesus to the cross, when the road to Calvary and safety lay always open before Him?

Some day we may know a little more about the answers to these questions. We are profoundly ignorant now. But there is in human nature a Control that is higher than self-interest—it is just the pituitary gland.

And Both Sides Profit

The head-master of a boys' school, who has gained a reputation for special wisdom in dealing with youngsters, tells me that the really "bad boy" is practically non-existent. Occasionally one turns up who is inspired by the devil and has to be sent away, but these cases are rare. The trouble comes with the normal, well-meaning boys who, by carelessness or extra hilarity, get themselves into situations that reflect discredit on the school.

"How do you deal with such cases?" I asked.

He answered that the problem had puzzled him for a long time, but that now he has a formula. "It's very simple, but it works wonders. When the boy is brought to my office for judgment I talk to him about the honor of his family name and the good name of the school. I show him that I am disappointed and distressed. And then I say to him: 'Honestly, I don't know what to do in a case like this. I guess you'll have to help me. Go to your room and think about this escape of yours over-night. Put yourself in my place, and ask what punishment you would prescribe if my responsibility were on your shoulders. Whatever decision you make will be my decision.'"

The wise gentleman added: "Invariably the boy comes back with a sterner suggestion than I would ever have dared to make. And there is no resentment."

I pass on this piece of wisdom for the benefit of parents who have struggled with the problem of home discipline. It has in it a thought for business men also. A very rich man of my acquaintance claims that he has made most of his money by following this precept: "Let the other man make the proposition." He says it is surprising how often the other man comes through with a proposal that is more than just. No deal is any good unless both sides profit, he says, and there is a surprising amount of fairness in human nature if you give it a chance to come out.

Wainwright

NEWS & VIEWS OF TOWN AND DISTRICT

BORN.—To Mr. and Mrs. J. Mac-
field of Wainwright, at the Wain-
wright municipal hospital, on July
16th, a girl.

BORN.—To Mr. and Mrs. J. J.
Wakelield, of Fabyan, at the Wain-
wright municipal hospital on July
18th, a girl.

BORN.—To Mr. and Mrs. Pete
Kellar, of Fabyan, at the Wain-
wright municipal hospital on July
19th, a boy.

Miss Beale Welch, eldest daugh-
ter of Mr. and Mrs. Joe Welch of
town, who has been assistant principal
of the schools at Big Valley for the
past four years, has been ap-
pointed to the high school staff at
Mackled Alta, for the coming term,
and Miss Grace Welch, the second
daughter, who has taught at Thor-
hill since leaving varsity, has been
added to the high school staff at
High River.

The booth at King's park at
Fabyan, which is being operated by
the Misses King and Lammle was
sure doing a rushing business on
Sunday last when the park was
crowded with visitors to enjoy a re-
lief from the terrific heat by a cool-
off in the river.

Much needed moisture was given
the whole district for a short time
on Saturday morning last when a
heavy rain fell for about an hour.
It did some little good to the later
crops.

Dr. Murphy, of Toronto, is in
town these days as a guest of Rev.
Father Doyle.

Tom Fotheringham is busy these
days renovating the boilers, etc.,
which were in the abattoir fire in the
National Park last fall.

Jack Talmie has completed sev-
eral improvements to his home, the
latest being the addition of ceme-
nt sidewalks around the house.

A large barn is being erected by
Mr. Geo. Smith on his farm holdings
south of Greenhalghs.

Quite a severe hail storm was ex-
perienced in the Auburndale dis-
trict last weekend, when the hail
stones were large enough to kill a
number of chickens. A fifty per cent
loss to some of the crops has been
estimated.

Mrs. Bob Tierney spent a few
days last week in Edmonton visiting
her sister there, with her little son.

Miss Margaret O'Connor, of Gill
Edge, was unfortunately thrown
from a horse last week and sus-
tained a broken collar bone. She is
now a patient at the hospital.

Mr. and Mrs. Bert Williamson,
of Fabyan, left this week on a motor
tour to Banff and Lake Louise.

A lawn party is arranged to be
held on Sunday afternoon next by
the ladies of the C.W.L. at the home
of Mrs. J. C. Keen, north of town.
All are invited.

Mrs. Kirk Snyder of Edmonton is
a visitor at the summer cottage of
Mr. and Mrs. R. A. Snyder at Clear
lake.

Yesterday (Tuesday, July 21st)
was the seventh anniversary of the
big Wainwright fire of 1929. The
21st fell on Sunday that year.

No matter what you need to
build, repair or paint with you will
find a large and complete stock at
the Atlas Lumber yard; the home of
good building material. Joe Welch,
mgr.

Having enjoyed a trip to Banff by
motor, Mr. and Mrs. Jack Telford
have now returned and are moving
down to their summer cottage at
Clear lake this week.

Although nothing is being heard of
the activities at the Montreal-Al-
berta deep oil well, we learn that
Mr. Beckett of the W. J. Beckett
syndicate is proceeding apace with
his plans for extensive oilfield work
in the Wainwright district.

JUNE 29th.

Highest Prices Paid—See Me
For Satisfaction

The Gill Edge M.D. started work
on grading up the east road north
of town near the Trafalgar school
this week.

A big forest fire was reported in
the Jasper National park on Mon-
day, which was destroying a large
quantity of timber in the beautiful
Maligne Lake territory.

We are sorry to learn that Mr. Pat
O'Reilly has had to return to the
hospital for further medical treat-
ment.

Mrs. Cal. Mackenzie and Mrs. J.
Robinson are in residence at the
Turner cottage at Clear lake this
week.

Miss L. Bloom left last week-end
for a visit to friends at Sylvan lake.

Some time over the week-end, a
small rifle was fired in town which
put a bullet through one of the
south windows of the Brunner Ser-
vice Station and also shattered the
windshield of a car in the oppo-
site of that building. The discharge
of firearms in town and village limits
is illegal!

Mr. Jack Laird was a visitor in
town for a day or so last week-end
visiting relatives.

It is estimated that some 6000
persons left Canada last week to be
present at the unveiling of the big
Vinny memorial in France on Sun-
day next.

After a couple of weeks spent at
the camp at Clear lake, Mr. and Mrs.
C. Horn and family have returned
home, and Charlie is back at the
“daily grind”!

Mrs. A. Balmer, of Heath, is a
patient at the hospital this week.

Mr. and Mrs. Hans Ebyen were in
the city for a few days last week.

Mr. and Mrs. Steve Bowerman
were in the city last week, and
rumor has it that Steve was lucky
enough to make most of his ex-
penses by picking the “worth-while”
bargains at the fair.

Ed Walker and Joe Collett were
in Edmonton to put in a few days
at the exhibition last week.

The Paschenale schoolhouse is
being thoroughly renovated and the
outside painted this week. Hugh
Moir is doing the work. The Park
Road school also is receiving the
same treatment.

The public school in town which
has been undergoing repairs at the
hands of Mr. Chas. Wear, is now
practically all ready for the opening
days of the next term.

Mr. and Mrs. L. O'Reilly were to
the city last week for a few days
and were noticed in attendance at
the big exhibition there.

Mr. Erie Bab, who had his collar
bone broken last week when he
was thrown from a horse at Gill
Edge is recovering nicely after
treatment at the hospital.

Mr. J. A. Turcotte and family re-
turned from the city last week
after a few days holiday.

Mr. Syd. Bibby has been appointed
agent for the B.A. Oil Co. and now
has an office in town.

A deep water well is being drilled
on the farm of Mr. John Muir at
Fabyan.

Mr. B. C. Carpenter, who is now
on the telegraphic staff at the C.N.
depot, has moved his family here
from Hildburg, Alta. They are oc-
cupying the house recently vacated
by Mr. Kirkpatrick.

Mr. D. C. Cameron and family left
for Banff on Sunday last to enjoy
his annual vacation there.

Having obtained employment at
the C.N. roundhouse, Mrs. Civil of
Edmonton, has now moved his family
into the McLeod house on King
street.

Grangedale school board are hav-
ing a pipe front entrance built on
their schoolhouse north of Heath.

Mr. and Mrs. W. A. Knowles are
leaving for the coast to attend the
Vancouver Jubilee celebration and
take part in the Yukon old-timers'
convention. Years ago Mr. Knowles
was a telegrapher in the Yukon
territory before enlisting for the
Great War, where he served in the
same capacity in the interior of
Russia.

Mr. O. Hutchinson is having a well
bored on his farm south of town
these days.

Mrs. E. Tucker, from Coult, Alta.
is in town these days visiting rela-
tives and friends.

By an Order-in-Council of the
Federal government, Thanksgiving
Day has been set for Monday, Oc-
tober 12th next.

Mrs. L. Baxter returned home
from Edmonton on Friday night
last.

Mr. E. (Bud) Cotton and family
are away for a holiday with friends
at the coast.

These days see a very large num-
ber of visitors to the Buffalo Na-
tional park from practically all over
the Dominion and the States. The
local folks, too, are taking their dips
at Mott lake bathing beach.

Mr. and Mrs. A. Patterson and
family have now returned from their
vacation which was spent at Banff.

Mrs. P. Brongest and daughter,
Marjorie of Hildburg, were in town
last week visiting Mrs. T. Wright
for a few days.

Monday's early morning rain was
welcome, too, but it did not last
long enough to be of value to the
crops.

We learn that Miss Roberta Snyder
passed in her A.T.C.M. exam. in
grade II theory with first-class
honors.

A party of neighbors and friends
to the number of about 55 visited at
the home of Mr. Robt. Reid on
Monday of last week when a real
happy and jolly time was spent till
nearly daylight next morn.

Last Sunday was the seventh
anniversary of Wainwright's big
conflagration and this is the driest
summer we have had since that time.
Be sure your property is insured
against fire with one of the strong
companies represented by Joe Welch.

Applications were received last
week by the provincial department
of mines for some 1,600 acres of oil
leases in the Wainwright district.

On Sunday next, the Canadian
Radio Commission will broadcast
over the whole network, speeches by
King Edward VIII. and President
Lebrun, of France, at the dedication
ceremonies of the Canadian memorial
at Vimy in France. The broadcast
will commence at 6:30 a.m. and end
at 8:45 a.m. M.S.T.

Quite a number of our returned
men were among the vast crowd
which on Sunday last celebrated the
annual reunion of the “49-ers” in
Edmonton. The service was held on
Parliament Hill, and the parade
from the center of the city was
watched by thousands.
